EDUCATION

Master of Computer Applications – Lovely Professional University (*Phagwara, India*) **Expected October 2026**

Bachelor of Computer Applications – University of Allahabad (*Prayagraj, UP*) **Graduated June 2023**

EXPERIENCE

Cognizant **July 2024 – August 2025**
Process Executive, gTech Ads *Gurgaon, Haryana*

- Worked in Agile/Scrum sprints with cross-functional teams to improve campaign operations for global gTech Ads clients.
- Validated AI-generated findings against defined guidelines before processing, acting as a human-in-the-loop quality check to ensure accurate outputs.
- Led the team to a **100% quality score** while maintaining a personal 100% quality score throughout the tenure.
- Awarded “**Star Performer of the Team**” twice for consistently exceeding performance expectations.

PRODUCT MANAGEMENT PROJECTS

Blinkit Category Discovery | NextLeap Capstone – Top Fellow MVP [↗](#) AI Engine [↗](#) **Aug 2026**

- Led user research (AI review mining, surveys, interviews) to segment users and test hypotheses on why they don’t explore new categories.
- Reframed the problem after finding that 85% of users never browse and that trust, not awareness, was the core barrier. Prioritized solutions using RICE.
- Shipped an AI-native MVP with personalized category suggestions and trust signals; defined north-star and guardrail metrics, GTM rollout, and risk mitigations.

Nykaa Fashion Wishlist Conversion | PM Case Study MVP [↗](#) AI Engine [↗](#) **Sep 2026**

- Broke wishlist-to-purchase conversion into a behavioural funnel, built an AI engine to classify feedback, and ran surveys and interviews to segment users and test hypotheses.
- Found users weren’t forgetting: the wishlist was too cluttered to decide from and absent at the buying moment; prioritized via RICE.
- Launched WishSense, a live AI MVP lifting conversion without discounts via an organized wishlist, confidence scores, and saved-item cart recs; defined north-star, guardrail metrics, and GTM.

FinSage [↗](#) | AI Portfolio Intelligence Platform **Jun 2026**

- Built a live AI platform for Indian retail investors to track NSE/BSE stocks and crypto, owning it end-to-end from user research and PRD to private beta.
- Designed a two-stage AI news pipeline filtering 95% of market noise at \$0/month cost, plus a RAG chatbot grounded in live holdings and P&L.
- Built a custom MCP server that emails real-time high-severity alerts and daily digests via Gmail, redesigned around beta feedback on trust and usability.

Groww Review Analyzer | Voice-of-Customer AI Pipeline **May 2026**

- Found that scattered Play Store reviews caused teams to miss release-critical bugs and spend hours each week on manual spreadsheet logging.
- Built a weekly AI pipeline that clusters recurring complaints, verifies quotes against raw reviews to prevent hallucinations, and delivers reports via MCP (Google Docs + Gmail), designed to cut bug-identification time from days to hours.

SKILLS

Product Skills: User Research, Product Discovery, Hypothesis Testing, Segmentation, Funnel Analysis, Problem Framing, Prioritization (RICE) & Roadmapping, PRD Writing, MVP Planning, Wireframing, Prototyping, Metrics Definition, Go-to-Market Strategy, Agile/Scrum

Tools & AI: SQL, Python, Jira, Notion, Figma, Next.js, React, Firebase, Vercel, LLM/API integration, RAG, MCP

CERTIFICATIONS

- **TOP FELLOW** – NextLeap Aug 2026
- **Systems Thinking & Mapping Outcomes** – NextLeap Apr 2026
- **User Research & Problem Framing** – NextLeap May 2026
- **Prioritisation, Metrics & Growth** – NextLeap May 2026
