EDUCATION

Lovely Professional University – Master of Computer Applications (*Phagwara, India*)

Expected August 2026

University of Allahabad – Bachelor of Computer Applications (*Prayagraj, UP*)

Graduated June 2023

EXPERIENCE

Cognizant

July 2024 – August 2025

Process Executive, gTech Ads

Gurgaon, Haryana

- Supported campaign and operational improvement initiatives for global clients within the gTech Ads team, collaborating across teams to improve workflow efficiency and process performance.
- Drove process optimization initiatives and contributed to operational decision-making through structured, analytical problem solving.
- Awarded “**Star Performer of the Team**” twice for exceeding performance expectations and delivering high-impact results.

PRODUCT MANAGEMENT PROJECTS

FinSage [🔗](#) | AI-Powered Portfolio Intelligence Platform

2026

- Owned FinSage end-to-end: ran user research, wrote and scored the PRD, and shipped a live platform that helps everyday investors track and understand their portfolios.
- Ran a private beta, used feedback on trust and usability to reshape the alerting and digest experience, and is now scoping a V2 built around user requests.

Groww Review Analyzer | Voice-of-Customer Intelligence Pipeline

2026

- Found that scattered Play Store feedback at Groww caused missed release-critical bugs and hours of manual spreadsheet work each week.
- Built an automated weekly system that clusters recurring complaints and delivers a verified report to stakeholders, cutting bug-identification time from days to hours.

ChatGPT Voice Adoption Research | User Research

2026

- Researched why Indian users weren't adopting ChatGPT voice input – ran surveys and interviews, framed hypotheses around language accessibility, and synthesized insights into clear recommendations.

Peppo Growth & Segmentation Case Study | Growth Strategy

2026

- Analyzed retention and growth challenges for a food-tech startup, identifying high-value segments and proposing prioritization strategies to improve repeat usage.

Smart Society [🔗](#) | AI-Assisted MVP

2026

- Designed an AI-assisted society management MVP – built wireframes and prototype flows in Stitch AI and Figma, defining features and user flows for residents, visitors, and security guards.

SKILLS

Product Skills: User Research, Product Discovery, Segmentation, MVP Planning, Wireframing, Prototyping, Product Strategy, Problem Framing, Prioritization & Roadmapping, PRD Writing

Tools & AI-Assisted Building: Jira, Notion, Figma, Stitch AI, ChatGPT, Claude, Full-stack prototyping (Next.js, Firebase), LLM/API integration
